EXPERIENCE

Cisco, Virtual Internship/Training In Cyber Security

Apr 2024 – May 2024

- Completed Cisco Networking Academy's Cybersecurity Essentials course.
- Acquired hands-on knowledge of cybersecurity fundamentals, including the CIA triad (confidentiality, integrity, availability).
- Gained an understanding of cybersecurity laws, frameworks, and compliance standards.

Wipro, Java Full Stack Development Training

July 2024 – Sep 2024

- Completed hands-on training in Java Full Stack Development as part of Wipro's talent transformation program.
- Gained strong understanding of core Java, object-oriented programming (OOP), collections, and exception handling.

PROJECTS

AcroCare – Mental Health AI Chatbot

Dec 2024 – Jun 2025

Acropolis Institute of Technology and Research, Indore, India

- Designed and developed an AI-powered mental health chatbot platform using Django, Python, HTML, CSS, and JavaScript.
- Enabled users to engage in safe, non-judgmental AI-driven conversations for emotional support.
- Integrated a daily journal writing feature to track emotions and encourage self-reflection.
- Delivered personalized mental wellness tips and curated mental health blogs through a responsive web interface.
- Implemented secure user authentication, profile management, and mood-based content delivery.
- Prioritized user privacy and accessibility to promote holistic mental well-being.

Personal Finance Tracker

Oct 2024 – Oct 2024

- Built a desktop-based finance management application using Python, Tkinter, and MySQL.
- Enabled users to record, categorize, and track daily income, expenses, and savings.
- Incorporated data filtering, transaction search, and monthly budgeting features for clarity and control.
- Secured financial records through local database storage and user-specific login access.
- Enhanced usability with an intuitive GUI for smooth navigation and real-time updates.
